Capiz Lantern Works — teacher key

557 steps over two months. The answer key was run through the real functions as one user holding every role (migration 0063) and its figures are stored for the Check (migration 0064).

1. Set up the team

1. Teacher page → **New team company**: name it, fiscal year start **2026-01-01**, **Standard costing**. It must stay empty.
2. **Teams** screen: add each student and tick their roles. You can change members and roles later at any time; the books do not care who posts.
3. The handout is written by ROLE. Give each student the pages of the roles they hold (each role starts on its own page).

Team size	Suggested split
2	A: Production, Warehouse, Quality, Purchasing. B: Sales, Accountant, Finance manager.
3	A: Production, Quality. B: Purchasing, Warehouse, Sales. C: Accountant, Finance manager.
5	Production + Quality · Purchasing · Warehouse + Sales · Accountant · Finance manager.
7	One role each.

Rule that needs two people: the Finance manager must not be the person who prepared a voucher or entered a held invoice. If one student holds both Accountant and Finance manager, those approval steps cannot be completed by them alone; give the roles to different students.

2. Key figures

Item	Figure
Net profit, February + March 2027	₱680,293.20
Sales orders / invoices	13 / 15 (SO-0013 is shipped 18 of 20 small pendants, 2 were scrapped)
Production orders	34 (including one hand-made rush order for 6 small shades)
Vendor invoices	25 (VI-0018 is rejected, then entered again as VI-0021); 26 bills with the freight bill
Inspection lots	32 (the PEN-S lot is split: 46 accepted, 4 reworked, of which 2 accepted and 2 scrapped)
Customer payments / vendor payments	9 totalling ₱881,688.00 / 23 totalling ₱422,434.21
Months	February and March 2027 both closed

3. Things the activity is designed to teach

- Bundles bought, kilograms stocked; a revised bill of materials (small pendant gets 2 foam pads in March) and a new standard cost.
- Inspection on receipt and on every finished lamp; return to vendor, scrap, rework and non-conformance reports.
- A held vendor invoice released by the Finance manager, another rejected and entered again.
- Vouchers needing a second person; a wrong voucher reversed and entered again; a control account that only an override voucher may touch.
- Partial deliveries and partial payments; a rush purchase and a hand-made rush order after scrap.

4. Common slips (and what the Check shows)

Slip	What you will see
Material issued with today's date	Costs land in the wrong month; the month will not close. Reverse the issue and post it again with the right date.
Finished lamps received into the normal store	No inspection lot; the Quality group fails.

Slip	What you will see
Vendor invoice entered before all goods were received	A smaller invoice than the key; void it and enter it again.
Wrong role tries a step	The system refuses and names the role needed: change the member's roles on the Teams screen.
Month closed before its orders are settled	Period End warns; variances land in the next month.

5. Marking

Open **Teacher** → the team's company → **Check**, choose *Activity 3 Manufacturing — Capiz Lantern Works*. Below the check results, **Who posted what** lists every member with their roles and the number of documents each posted, so the work can be graded fairly even when roles changed hands.

6. The whole sequence

Every step in company order, with its role.

#	Date	Screen	Role	What to do
1	Feb 1	Master Data → Units of measure → Add unit	Production planner	Code **BDL**, name *Bundle*.
2	Feb 1	Master Data → Items → Add item	Production planner	**CAP-SH** Capiz shell sheets, unit KG, Raw material, Buy, lead time 5 days; planned price 420.
3	Feb 1	Master Data → Conversions → Add conversion	Production planner	For **CAP-SH**: 1 **BDL** = **5 KG**.
4	Feb 1	Master Data → Items → pencil on CAP-SH	Production planner	Choose **Buy it in BDL** and save.
5	Feb 1	Master Data → Items → Add item	Production planner	**WIR-FR** Steel wire frame, unit PC, Raw material, Buy, lead time 4 days; planned price 35.
6	Feb 1	Master Data → Items → Add item	Production planner	**BRS-RD** Brass rod, unit M, Raw material, Buy, lead time 4 days; planned price 85.
7	Feb 1	Master Data → Items → Add item	Production planner	**BRS-FT** Brass fitting set, unit PC, Raw material, Buy, lead time 4 days; planned price 60.
8	Feb 1	Master Data → Items → Add item	Production planner	**LED-KT** LED kit, unit PC, Raw material, Buy, lead time 6 days; planned price 150.
9	Feb 1	Master Data → Items → Add item	Production planner	**CRD-SW** Cord and switch set, unit PC, Raw material, Buy, lead time 6 days; planned price 55.
10	Feb 1	Master Data → Items → Add item	Production planner	**GLU-AD** Adhesive, unit L, Raw material, Buy, lead time 3 days; planned price 190.
11	Feb 1	Master Data → Items → Add item	Production planner	**CLR-CT** Clear coat, unit L, Raw material, Buy, lead time 3 days; planned price 260, tick **Track batches / lots**.
12	Feb 1	Master Data → Items → Add item	Production planner	**CTN-LP** Lamp carton, unit PC, Packaging, Buy, lead time 3 days; planned price 38.
13	Feb 1	Master Data → Items → Add item	Production planner	**FOM-PD** Foam padding, unit PC, Packaging, Buy, lead time 3 days; planned price 12.
14	Feb 1	Master Data → Items → Add item	Production planner	**SHD-S** Small capiz shade, unit PC, Semi-finished, Make, lead time 2 days; usual store RM-STORE.
15	Feb 1	Master Data → Items → Add item	Production planner	**SHD-L** Large capiz shade, unit PC, Semi-finished, Make, lead time 2 days; usual store RM-STORE.
16	Feb 1	Master Data → Items → Add item	Production planner	**BAS-BR** Brass base, unit PC, Semi-finished, Make, lead time 2 days; usual store RM-STORE.
17	Feb 1	Master Data → Items → Add item	Production planner	**PEN-S** Small pendant lamp, unit PC, Finished good, Make, lead time 3 days.
18	Feb 1	Master Data → Items → Add item	Production planner	**PEN-L** Large pendant lamp, unit PC, Finished good, Make, lead time 3 days.
19	Feb 1	Master Data → Items → Add item	Production planner	**TBL-LP** Table lamp, unit PC, Finished good, Make, lead time 3 days.
20	Feb 1	Master Data → Items → Add item	Production planner	**FLR-LP** Floor lamp, unit PC, Finished good, Make, lead time 4 days.
21	Feb 1	Master Data → Items → Add item	Production planner	**CHD-4** Four-arm chandelier, unit PC, Finished good, Make, lead time 5 days.
22	Feb 1	Master Data → Work centers → Add work center	Production planner	Name **Cutting** (leave the other boxes).

#	Date	Screen	Role	What to do
23	Feb 1	Master Data → Work centers → Add work center	Production planner	Name **Assembly** (leave the other boxes).
24	Feb 1	Master Data → Work centers → Add work center	Production planner	Name **Finishing** (leave the other boxes).
25	Feb 1	Master Data → Work centers → Add work center	Production planner	Name **Packing** (leave the other boxes).
26	Feb 1	Master Data → Locations → Add location	Production planner	Code **STORE-B**, name *Second raw material store*, kind RM.
27	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Cutting**, Direct labor, from **2027-02-01**, **75** per hour.
28	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Cutting**, Machine time, from **2027-02-01**, **45** per hour.
29	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Assembly**, Direct labor, from **2027-02-01**, **75** per hour.
30	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Assembly**, Machine time, from **2027-02-01**, **20** per hour.
31	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Finishing**, Direct labor, from **2027-02-01**, **75** per hour.
32	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Finishing**, Machine time, from **2027-02-01**, **35** per hour.
33	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Packing**, Direct labor, from **2027-02-01**, **75** per hour.
34	Feb 1	Master Data → Activity rates → Add rate	Accountant	**Packing**, Machine time, from **2027-02-01**, **10** per hour.
35	Feb 1	Master Data → Costing sheet → pencil on Fixed overhead	Accountant	**Plus ₱ per hour** = **25**.
36	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**SHD-S**, valid from **2027-02-01**: CAP-SH 0.4 · WIR-FR 1 · GLU-AD 0.05 · CLR-CT 0.04. Save draft, then Activate.
37	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**SHD-L**, valid from **2027-02-01**: CAP-SH 0.9 · WIR-FR 2 · GLU-AD 0.1 · CLR-CT 0.08. Save draft, then Activate.
38	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**BAS-BR**, valid from **2027-02-01**: BRS-RD 0.6 · BRS-FT 1. Save draft, then Activate.
39	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**PEN-S**, valid from **2027-02-01**: SHD-S 1 · LED-KT 1 · CRD-SW 1 · CTN-LP 1 · FOM-PD 1. Save draft, then Activate.
40	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**PEN-L**, valid from **2027-02-01**: SHD-L 1 · LED-KT 1 · CRD-SW 1 · CTN-LP 1 · FOM-PD 2. Save draft, then Activate.
41	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**TBL-LP**, valid from **2027-02-01**: SHD-S 1 · BAS-BR 1 · LED-KT 1 · CRD-SW 1 · CTN-LP 1 · FOM-PD 1. Save draft, then Activate.
42	Feb 1	Master Data → Bills of materials → New BOM	Production planner	**FLR-LP**, valid from **2027-02-01**: SHD-L 1 · BAS-BR 1 · BRS-RD 1.2 · LED-KT 1 · CRD-SW 1 · CTN-LP 1 · FOM-PD 2. Save draft, then Activate.
